

BHAVISHYA THECH

Data Analyst

Sirsa, Haryana, India | +91 9817513168 | bhavishyathech@gmail.com

PROFESSIONAL SUMMARY

Data Analyst with a BCA (2026) and hands-on experience in data cleaning, exploratory data analysis (EDA) and dashboard development using SQL, Python (Pandas, NumPy, Matplotlib), Power BI and Excel. Built five end-to-end analytics projects covering loan risk analysis, sales and production dashboards, and a machine learning classification app, and completed a Python / AI-ML internship. Seeking an entry-level Data Analyst role to turn raw data into clear, actionable business insights.

TECHNICAL SKILLS

Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Dashboard Development, KPI Reporting

Databases & Languages: SQL, MySQL, Python

SQL Concepts: JOINS, GROUP BY, CASE WHEN, CTEs, Subqueries, Aggregate Functions, Window Functions

Python Libraries: Pandas, NumPy, Matplotlib, Scikit-Learn

BI & Reporting: Power BI (DAX, Interactive Dashboards), Microsoft Excel (Dashboards, Slicers, Charts) **Tools:** GitHub, Streamlit, Tkinter

PROJECTS

Loan Data Analysis | MySQL, SQL | [GitHub](#)

- Analyzed loan applications, loan status, loan amounts, credit scores, loan types, interest rates and customer loan details in MySQL to uncover risk patterns.
- Segmented 10,000 loans into high-, medium- and low-risk credit bands and found the high-risk band had the highest approval rate (71.76%) versus 67.99% for low-risk.
- Wrote multi-step queries using JOINS, CTEs, subqueries, CASE WHEN, aggregate and window functions to explore the dataset in depth.
- Ran data quality checks before analysis to keep insights reliable and support business decision-making.

Mobile Sales Dashboard | Power BI | [GitHub](#)

- Built an interactive Power BI dashboard analyzing INR 769M in total mobile sales, transaction behavior and customer ratings.
- Designed visualizations and filters to identify top-performing brands (Apple, OnePlus, Samsung, Vivo, Xiaomi) and regional sales patterns.

Production Dashboard | Microsoft Excel

- Created an Excel dashboard with KPIs, slicers and dynamic charts to track production performance.
- Designed an easy-to-navigate, interactive layout that enables quick, data-driven decisions.

Corporate Data Analyzer App | Python, Tkinter, Pandas, Matplotlib | [GitHub](#)

- Developed a desktop application that reads CSV/Excel files and generates group-by aggregation reports.
- Added chart previews and one-click export of reports and charts, automating repetitive analysis tasks.

Fake News Detection App | Python, Streamlit, Scikit-Learn | [GitHub](#)

- Built a machine learning web app using Logistic Regression and Scikit-Learn to classify news as real or fake.
- Deployed the model with a Streamlit interface for real-time, text-based predictions.

EXPERIENCE

Python / AI-ML Intern

June 2025 – July 2025

Solitaire Infosys Pvt. Ltd.

- Built a Fake News Detection web app (Python, Scikit-Learn, Streamlit) to classify news as real or fake.
- Applied Python for data handling and analysis on AI/ML tasks, from data preparation to generating insights.

CERTIFICATIONS

- Complete Data Analyst Bootcamp: Basics to Advanced (89 hours) – Udemy, July 2026
- 30 Days Power BI Micro Course – SkillCourse, July 2026
- Python Course – SkillCourse, September 2026

- Deloitte Data Analytics Job Simulation – Forage, August 2026
- Python AI/ML Training Certification – Solitaire Infosys Pvt. Ltd., July 2026
- Foundations: Data, Data, Everywhere – Google (Coursera)

EDUCATION

Bachelor of Computer Applications (BCA)	2023 – 2026
Chaudhary Devi Lal University (CDLU), Sirsa CGPA: 7.50	
Senior Secondary (12th): 75%	2022
Secondary (10th): 80%	2020
